Works with what you already use Messenger GCash Maya Google Sheets Gmail Telegram Supabase

WHAT WE BUILD

Six packages. Start small, grow when you're ready.

Each one is built from systems we've already shipped, so you get something tested, not an experiment.

01

Live in days

Messenger order and inquiry bot

Answers FAQs, takes orders, and alerts you on Telegram, right inside your Facebook page's Messenger.

Good for: refilling stations, food sellers, salons, resellers

From [YOUR PRICE]

02

Proven at live events

Booking, ticketing, and payments

Booking pages, GCash and Maya payments, QR e-tickets sent by email, and a door-scanning dashboard for check-in.

Good for: events, resorts, studios, clinics, tutoring centers

From [YOUR PRICE]

03

Great add-on

Reports and receipt automation

Daily or weekly sales summaries to Telegram or email, receipts and invoices captured into spreadsheets, and simple dashboards.

Good for: owners who still total sales by hand

From [YOUR PRICE]

04

Fastest start

Landing page

A fast, mobile-first page with an inquiry form that sends leads to Telegram, email, or Sheets, plus a Messenger button, share previews, and domain setup.

Good for: new businesses, events, promos

05

Fixed milestones

Custom apps and web systems

Android and iOS apps from one codebase, and custom web apps with dashboards, logins, user roles, and payments.

Good for: ordering apps, booking platforms, portals, internal tools

06

2-5 day sprints

Google Workspace automation

Automations inside the Sheets, Forms, Gmail, and Drive you already use: auto invoices, quotations, certificates, trackers, approvals, and scheduled reports.

Good for: teams that already run on spreadsheets

From [YOUR PRICE]

Quoted after a scoping session

From [YOUR PRICE] per workflow

POPULAR BUNDLE

Landing page + Messenger bot. The page brings customers in, and the bot answers them, even after hours.

[Ask about the bundle](#)

OUR WORK

Already built. Already running.

[Screenshot: Exclusives PH booking page and ticket scanner]

EXCLUSIVES PH · EVENTS

Event booking with GCash payments and QR tickets

Guests book online, pay with GCash or Maya, and get a QR e-ticket by email. Staff scan tickets at the door from a live dashboard. Built to handle real event-night traffic.

Booking PayMongo QR e-tickets Door scanning

Result: [e.g., tickets sold, check-in time]

[Screenshot: Messenger bot conversation and order sheet]

WATER REFILLING STATION · RETAIL

A Messenger bot that takes orders around the clock

Customers message the page to ask questions or order. The bot answers FAQs, logs every order to Google Sheets, and pings the owner on Telegram.

Messenger AI FAQ replies Google Sheets Telegram alerts

Result: [e.g., orders handled per week, hours saved]

HOW WE WORK

Clear steps, fixed prices, no guesswork.

1

Tell us your routine

Share what you do by hand every day. We'll suggest the smallest fix that saves the most time.

2

Try a live demo

Click through a working version with sample data before you commit. A demo, not just a pitch.

3

We build at a fixed price

Clear scope, set milestones, and a deposit up front. No open-ended hourly billing.

4

Launch, then we look after it

A one-time setup fee, then an optional monthly plan for fixes, updates, and small changes.

Your customers' data, handled properly

We follow Data Privacy Act basics on every build: consent, secure storage, and a clear privacy notice.

You own what we build

Accounts, code, and scripts stay in your name, with a documented handover of what each part does.

THE TEAM

Five builders, one team.

Automation, data, design, testing, and web, all under one roof, so nothing gets lost between freelancers.

CJ

Automation, backend, and APIs

Rodney

Reports, dashboards, and Google Workspace automation

Jhon

Brand, UI/UX, and mobile apps

Kit

Quality assurance, testing, and mobile apps

John Phillip

Websites and frontend development

LET'S TALK

What eats up your day? Let's automate it.
